SUMMARY

Software Engineer with experience developing production-grade backend systems using Java, Spring Boot, PostgreSQL, and Redis. Passionate about distributed systems, scalable backend architecture, and developer infrastructure, with hands-on experience building reusable libraries and secure financial applications.

EXPERIENCE

IT Analyst

National Payments Corporation of India (NPCI)

September 2025 - Present, Hyderabad

- Leading the migration of an organization-wide Redis Cluster client library from Java 17 to a modern Java platform using Virtual Threads (Project Loom).
- Implementing TLS-encrypted Redis communication to standardize secure connectivity across production services.
- Developed reusable backend libraries that simplified Redis integration and improved code reuse across internal backend services.
- Built secure authentication, authorization, monitoring, and alerting workflows for banking applications.
- Delivered backend features across the complete software lifecycle, including development, testing, deployment, and production support.

PROJECT

InfraWrapper – Multi-Tenant Infrastructure Library

Java | Spring Boot | PostgreSQL | Redis | Docker • March 2026 - April 2026

- Developed a reusable Spring Boot starter for automatic PostgreSQL schema and Redis namespace isolation.
- Built modular infrastructure components for API tracking, metrics aggregation, connection pooling, and tenant management.
- Simplified deployment of multiple backend applications on shared cloud infrastructure.

FinLedger – Personal Finance Platform

November 2025 - December 2025

- Built a personal finance platform based on a double-entry ledger.
- Developed secure REST APIs using Spring Boot, JWT authentication, and role-based access control.
- Implemented recurring payments, budgeting, reconciliation, and transaction categorization.
- Improved balance retrieval using Redis caching and PostgreSQL.

AI Research Assistant

May 2024 - June 2024

- Built a Chrome extension that summarizes webpages using Gemini API.
- Developed backend APIs using Spring Boot for AI-powered content summarization.

EDUCATION

Bachelor of Technology in Chemical Engineering

Indian Institute of Technology Hyderabad • Hyderabad • 2021–2025 • 7.51/10

INVOLVEMENT

Internship & Placement Coordinator

IIT Hyderabad

Outbound Head, International Relations Cell

IITHyderabad

SKILLS

Languages: Java, C++, Python, JavaScript, SQL

Backend: Spring Boot, REST APIs, PostgreSQL, Redis, Kafka, Spring-security, Flyway, Maven, JWT

Distributed Systems: Concurrent Programming, Virtual Threads, Connection Pooling, Caching, Microservices

Cloud & DevOps: Git, GitHub, Supabase, Upstash Redis
